

INFORMATION TECHNOLOGY TECHNICIAN AND PRODUCTION SUPPORT ASSOCIATE

Professional Summary

Versatile Information Technology Technician with over twenty years of combined experience spanning tier-one technical support, help desk operations, and production floor systems support. Brings a rare combination of deep end-user empathy and hands-on infrastructure capability, developed across manufacturing, administrative, and service environments. Consistently recognized for reducing ticket resolution times while maintaining exceptional customer satisfaction scores. Comfortable working independently or as part of a distributed support organization.

Areas of Expertise

Tier One and Tier Two Support | Help Desk Ticketing and Documentation | Hardware Diagnostics Network Troubleshooting | Windows and Legacy System Administration | Inventory Management End-User Training | Vendor Coordination | Production Systems Support | Process Documentation

Professional Experience

Production Support Associate CompanyName | City, State | 03/2006 to Current - Provide frontline technical support for production floor systems serving 200 operators across two shifts, sustaining an average response time under 12 minutes. - Diagnose and resolve hardware, network, and application faults on production terminals, reducing unplanned line stoppages attributable to IT by 35 percent year over year. - Maintain the departmental equipment inventory, reconciling asset records quarterly and identifying 40,000 dollars in recoverable unused licenses. - Author and maintain standard operating procedures for common fault scenarios, cutting average escalation volume by roughly one third. - Coordinate with external vendors on warranty repairs and replacement logistics. - Deliver onboarding technology orientation to new production staff on a rolling monthly basis.

Information Technology Technician CompanyName | City, State | 01/2000 to 10/2002 - Delivered computer help desk support via telephone to a distributed end-user population, logging and resolving an average of 90 tickets per week. - Performed systematic diagnostics and troubleshooting of desktop and peripheral issues. - Documented help desk tickets and resolutions in the departmental tracking system, building a reusable knowledge base referenced by the wider support team. - Maintained equipment inventory records and coordinated hardware refresh cycles. - Trained end users on newly deployed applications and operating system upgrades.

Information Technology Technician CompanyName | City, State | 02/1996 to 01/2000 - Provided computer help desk support and technical training on hardware and software to end users across administrative and field offices. - Supported daily administration of a Novell NetWare network environment. - Documented tickets and resolutions, contributing to departmental reporting. - Performed setup, breakdown, and transport of agency equipment for offsite events as required. - Assisted with the migration from legacy word processing platforms to standardized office productivity software.

Key Accomplishments - Designed a shared troubleshooting reference that reduced average first-call handling time by eight minutes across the support team. - Identified a recurring configuration fault affecting 60 production terminals and implemented a standardized remediation, eliminating a persistent weekly outage. - Recognized twice for sustained customer service performance in annual departmental reviews.
