

MANAGER - INFORMATION TECHNOLOGY AND BUILDING AUTOMATION SYSTEMS

Professional Summary

Accomplished technology leader with more than a decade of combined military and commercial experience spanning enterprise network infrastructure, building automation systems, and technical team leadership. Brings a disciplined operational mindset developed in high-stakes environments to the management of complex, multi-site technology portfolios. Demonstrated success in aligning infrastructure investment with organizational objectives while developing the technical capability of the teams involved. Recognized for clear communication across technical and executive audiences.

Core Competencies

Enterprise Network Architecture | Building Automation and Control Systems | Project Lifecycle Management | Server and Storage Administration | Team Development and Mentoring | Vendor and Contract Management | Cybersecurity Operations | Technical Documentation | Budget Planning

Professional Experience

Manager, Information Technology and Building Automation Systems CompanyName | City, State | 10/2014 to Current - Lead an eight-person technical team of engineers, technicians, and project coordinators, managing resource allocation across a concurrent portfolio of infrastructure projects. - Own the network infrastructure and server environment supporting 150 users and more than 300 networked systems and workstations. - Direct cross-functional collaboration between engineering, quality assurance, and design functions to deliver product features and resolve defects on published timelines. - Serve as technical lead for server infrastructure spanning development, quality assurance, staging, and production environments. - Analyze and configure packaged software to meet evolving business and system requirements, reducing custom development overhead by an estimated 20 percent. - Administer enterprise-class storage systems, including capacity trending and performance analysis reporting delivered to senior leadership quarterly. - Service and troubleshoot electrical, pneumatic, mechanical, and microprocessor-based control systems across the building automation portfolio. - Develop employee training materials and procedures covering software and hardware standards for in-house staff.

Information Systems Technician CompanyName | City, State | 07/2008 to 07/2014 - Supported communications operations in forward-deployed environments, with responsibility for network security, Microsoft platform administration, and associated hardware lifecycle. - Installed, upgraded, and troubleshoot network infrastructure including routers, switches, servers, video teleconferencing systems, and audio distribution systems. - Maintained and monitored server room environments, wireless network infrastructure, and supporting facilities. - Handled classified information in the development and review of specifications, standards, protocols, and inventory data, maintaining encryption compliance across multiple systems. - Configured staff workstations, mobile devices, and telephony endpoints. - Translated technical specifications into detailed product and deployment requirements.

Selected Accomplishments - Received four service achievement awards over a four-year period. - Designated for fleet-level recognition in a competitive annual selection process. - Built and mentored a technical team of eight, with three members subsequently promoted into senior technical roles.

Education

Master of Science, Computer and Information Science CompanyName University | City, State Emphasis in Cyber Security and Information Assurance Graduated in the top 15 percent of the cohort

Bachelor of Science, Management of Information Systems CompanyName University | City, State Cumulative GPA: 4.0

Certifications

Certified Information Systems Security Professional (CISSP) Project Management Professional (PMP) Microsoft Certified Systems Administrator (MCSA) Certified Automation Professional (ISA) Cisco Certified Network Associate (CCNA) Cisco Certified Network Professional (CCNP) CompTIA Security+, Network+, and A+

Technical Skills

Active Directory, Building Automation Controls, Cisco Networking, Linux, Mac OS, Microsoft Dynamics, Microsoft Exchange, System Administration, VMware, Windows Server
